# Patching Worksheet 1: making an interface

This exercise takes place in presentation view.
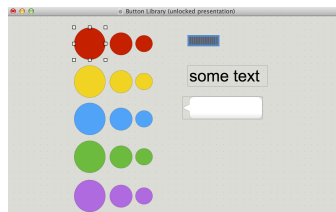

1) Choose a template by double-clicking on the icon on the desktop.

2) Find your backdrop photo on the computer. Drag it onto the template window.

3) Resize the image to fit the *Mira frame* by clicking on it and dragging its corners.

4) Open the button library by double-clicking on the icon on the desktop.

5) Copy a button you want to use from the library: click on one and press **CMD⌘-C**.

6) Click somewhere on your template window and press **CMD⌘-V** to paste the buttons in. Click on the corners to resize them.

See patching worksheet 2 to connect the buttons and make sound!
